ABOUT US

We are a group of engineering professionals with more than 24 years of experience in EPCM projects of great importance in the Mining, Energy, Petrochemical and Industrial industry, in Purchasing Management, Quality Management, Electromechanical Assembly, Manufacturing Processes And Maintenance (RCM).

EXPERIENCE

We have led groups of work in Office and Land, implemented and generating Management Management Systems, Implementation of Work Procedures, Design of Inspection Plans and Tests (ITP), Quality Manuals, etc.

Our professionals have participated in the construction of several Thermoelectric Power Plants, with vast knowledge in the area of welding (WPS, PQR and WQP), alloys, stainless steels, duplex steels, Aluminum, etc. Under ASME, AWS, API, AISC, AWWA, ASTM, CEMA, Chilean Standard, ISO 9000 standards, etc.

We have experience in the Inspection and Activation of Ball Mills, Primary Crushers, SAG Mills, Flotation Cells, Concentrate Thickeners, Reverse Osmosis Plants, Crane Bridges, Conveyor Belts, Power Boilers, Heat Exchangers, Electric Rooms, Transformers , Storage Tanks, Pressure Vessels, Structures, Boilermaking, Piping, Compressors, Pumps, Hydro-cyclones, etc. Coordination International Inspections, China, Germany, South Africa Canada, Turkey etc.

We also have experience in Risk Prevention, Economic Project Evaluation, Engineering Development and Cost Control.

INTERNACIONAL

Our professionals speak fluent English and have inspected in the United States and other countries.
